Data come from the Integrated Postsecondary Education Data System (IPEDS), the Department of Homeland Security's SEVIS by the Numbers, the National Assessment of Educational Progress, NSF's Survey of Graduate Students and Postdoctorates and Survey of Earned Doctorates, the Department of Labor's Office of Foreign Labor Certification, the USCIS H-1B Employer Data Hub, the Census Bureau's American Community Survey and USPTO patent data via PatentsView, processed in Python; every figure and table is generated from those sources, and each one names its source.

# About This Profile

This profile is a companion to *The 2026 US Talent Report: Benchmarking America's STEM Pipeline Amid the Great Talent Competition*. It applies the report's measures to Florida: the students the state develops at home, those it draws from abroad, and how both compare with the nation and with the states closest to it in size.

Degrees, enrollment, prices, outcomes and faculty come from IPEDS, the federal census of U.S. colleges and universities, harmonized across 1980–2025. Countries of citizenship come from SEVIS by the Numbers, the Department of Homeland Security's monthly count of active F-1 and M-1 students. Each figure names its source. Peer states are the four closest in total fall enrollment.

AT A GLANCE

# What Florida's numbers say

1. **International students earn 40% of Florida's STEM master's degrees,** 12.4 points below the U.S. (52%) in 2025, ranking 28th of 51 on dependence. The share is 47% for STEM research doctorates (U.S. 43%) and 5.3% for STEM bachelor's (U.S. 6.6%).
2. **Florida awarded 3.53K STEM master's degrees to international students in 2025,** 3.0% of the U.S. total and 12th of 51 among states. Since 2015 the count changed +84%, against 2.2× nationally.
3. **The heaviest dependence is in computer & info sciences,** where international students earned 66% of master's degrees (3.32K degrees; U.S. 65%). One STEM field with at least 50 master's graduates is majority-international.
4. **Among states of similar size,** Florida ranks 5th of 5 on the international share of STEM master's: Florida 40%, New York 64%, Illinois 66%, Arizona 41%, Texas 62%.
5. **81% of Florida's first-time students in fall 2024 were state residents** and 2.3% came from abroad. More students arrived from other states (23.1K) than residents left (22K), a net gain of 1.12K; the top destination for those leaving was Georgia.

**40%**

of the STEM master's degrees Florida awards go to international students (U.S. 52%).

# International Dependence

Florida ranks 28th of 51 states on the international share of STEM master's, at 40% in 2025 against 52% for the U.S.

**Figure 1** What Share of Florida's Degrees Go to International Students?

International share of degrees awarded, all fields; state solid, U.S. dashed. Data from NCES, IPEDS Completions, 1985–2025.

International students make up 13% of Florida's graduate enrollment and 4.4% of its undergraduates. Dependence climbs with each degree: 3.9% of bachelor's, 15% of master's and 25% of research doctorates go to international students.

In STEM the shares are higher still: 5.3% of STEM bachelor's, 40% of STEM master's and 47% of STEM doctorates. The state awards 3.0% of all U.S. international STEM master's, 12th of 51.

# How Does Florida's Mix of Countries Compare With the Nation's?

In October 2026, Florida had **66.5K** active F-1 and M-1 students, 5th of 51 states and **5.6%** of the U.S. total. They came from 193 countries.

Brazil supplied **17%** of them, against 3.4% nationally, and India **15%**, against 27%. Colombia (5.6%), China (5.5%), and Vietnam (3.3%) followed.

Together the two largest countries supplied **32%** of the state's international students (U.S. 45%), 35th among the states, against 27% in 2015.

# How International Are Florida's Master's Fields?

Each row is a master's field with at least 30 graduates in Florida in 2025, ranked by the share of degrees earned by international students (U.S. nonresidents on temporary visas). The filled dot is the state's share; the open dot is the national share for the same field.

**Highest international shares.** International students earned the largest shares of master's degrees in computer & info sciences (66%, against 65% for the U.S.), interdisciplinary (38%, against 46% for the U.S.), and math & statistics (38%, against 55% for the U.S.).

The table gives the international share of degrees in each STEM field at three levels: Florida first, the United States after the slash. The master's column is highlighted. A dash means the state awarded no degrees in the field at that level.

**Highest international share among STEM master's fields.** International students earned 66% of the master's degrees in computer & info sciences, against 65% for the U.S.

**Fields with an international majority.** International students earned more than half of the master's degrees in one STEM field.

# Graduate Research

Florida ranks 7th of 51 states on research doctorates awarded, at 2.5K in 2025 against 59K for the U.S.

In 2016, the last year NSF published state tables, 36% of Florida's science and engineering graduate students held temporary visas (U.S. 39%; 20th of 51).

Among postdoctoral researchers, the share was 44% (U.S. 56%). Postdocs are the stage of research training most dependent on international talent, and IPEDS does not count them.

The state's institutions awarded 2.5K research doctorates in 2025, 4.2% of the U.S. total (Data from NSF NCSES, Survey of Earned Doctorates; NSF publishes doctorates by citizenship only for the nation).

State solid, U.S. or participating states dashed.

Florida's institutions do not take part in the Census Post-Secondary Employment Outcomes program, so in-state employment of its graduates is not published.

Among international graduates on Optional Practical Training in 2016, 49% worked in the state where they studied (U.S. 44%). Through migration between states, the state gained 0.7 bachelor's-plus adults per 1,000 such residents in 2025 (Data from U.S. Census Bureau, American Community Survey).

Florida's universities spent $3.79B on research and development in FY2024, 10th of 51 among the states; 49% of it was federally funded (U.S. 55%).

Federal agencies obligated $4.63B for R&D performed in the state in FY2024. Research funding drives demand for graduate students and postdocs, the stage of training most dependent on international talent.

Certified H-1B positions on labor condition applications by worksite and certified PERM green-card applications, by fiscal year (Data from DOL, Office of Foreign Labor Certification); new H-1B petition approvals by the employer's address (Data from USCIS, H-1B Employer Data Hub).

Employers were certified for 22.5K H-1B positions at Florida worksites in FY2025, 10th of 51 among the states. A labor certification comes before the petition, so this overstates hires; USCIS approved 3.96K new H-1B petitions from employers in the state in FY2026.

DOL certified 6.37K PERM applications, the employer's step toward an employment-based green card, for jobs in the state in FY2025. In FY2024, 14% were for workers still on F-1 student visas (U.S. 8.7%): the most direct link from classroom to permanent residence.

SECTION 12 · FIELDS OF STUDY

# Where Is Florida Specialized, and What Do Its Doctoral Graduates Study?

The location quotient divides a field's share of Florida's bachelor's degrees by its share of all U.S. bachelor's degrees in 2025. A quotient of 1.00 means the same share as the nation; 2.00 means twice the national share. The table lists the 10 fields with the highest quotients among fields with at least 50 degrees.

**Highest location quotients.** Mechanic & repair (10.08, with 0.1% of the state's bachelor's degrees against 0.0% for the U.S.), transportation (4.61, with 1.7% of the state's bachelor's degrees against 0.4% for the U.S.), and communications tech (3.06, with 0.8% of the state's bachelor's degrees against 0.3% for the U.S.) had the highest quotients.

Florida ranks 7th of 50 states on the share of completion within 150% of normal time, 2-year institutions, at 60% in 2024 against 41% for the U.S.

## Figure 37 How Do Graduation Rates Differ by Sector?

Six-year bachelor's graduation rate by sector of institution. Data from NCES, IPEDS Graduation Rates.

68% of students who started a bachelor's degree at a four-year institution in Florida graduated within six years (2024), 3.4 points above the U.S. (65%); the state ranks 12th of 51.

By sector: public 4-year 76%, private nonprofit 58%, for-profit 45%. At two-year institutions, 60% complete within 150% of normal time (U.S. 41%).

# How Many of Florida's Students Graduate?

The line follows the share of first-time, full-time bachelor's-degree students at Florida's four-year institutions who graduated from the institution where they started within six years (150% of normal time). Each year is the cohort that entered six years earlier. The state is solid and the United States dashed.

**Six-year graduation rate.** The rate was 68% in 2024, against 65% for the U.S., up 0.7 points from 67% in 2023 and up 9.7 points since 2015, when it was 58%.

**Public 4-year institutions.** The rate was 76% in 2024, up 1.2 points from 75% in 2023 and up 9.4 points since 2015, when it was 66%.

# Faculty

Florida ranks 22nd of 51 states on the average full-time faculty salary, at $97.4K in 2024 against $106K for the U.S.

**Figure 40** What Do Florida's Faculty Earn, by Rank?

Average salary of full-time instructional faculty on 9/10-month contracts, by academic rank, 2024 dollars (CPI-U). Data from NCES, IPEDS Human Resources.

Full-time instructional faculty on 9/10-month contracts at Florida's institutions earned an average of $97.4K in 2024 (2024 dollars), 8% below the U.S. ($106K); the state ranks 22nd of 51. By rank (2024): professors $137K, associate professors $102K, assistant professors $84.6K, instructors $66.8K, lecturers $77.7K.

Florida's institutions had 29.6K full-time instructional staff in 2024, up 7% since 2015. Average salary across all ranks is down 6% since 2016.

# What Do Florida's Faculty Earn, and How Many Hold Tenure?

The line follows the average salary of full-time instructional faculty on 9- or 10-month contracts at Florida's degree-granting institutions, all ranks combined, in 2024 dollars (CPI-U). The state is solid and the United States dashed.

**Average salary.** The figure was $97.4K in 2024, against $106K for the U.S., 22nd among the states, up 1.4% from $96.1K in 2023 and down 5.8% since 2016, when it was $103K.

**Full-time instructional staff.** The number was 29.6K in 2024, up 1.6% from 29.1K in 2023 and up 7.4% since 2015, when it was 27.6K.

SECTION 16 · INSTITUTIONS

# Which Institutions Lead in Florida?

The table ranks institutions in Florida by the STEM master's degrees and research doctorates they awarded to international students in 2025, the two counted together. The share columns give international students' share of each institution's STEM degrees at that level.

**Largest.** University of Florida (728 international STEM master's degrees and 197 doctorates), University of South Florida (724 international STEM master's degrees and 73 doctorates), and Florida Atlantic University (467 international STEM master's degrees and 27 doctorates) awarded the most.

NOTES

# About These Data

### International students

U.S. nonresidents on temporary visas, as IPEDS defines them. IPEDS does not record country of citizenship. Permanent residents count with U.S. citizens.

### STEM

CIP families 03, 04, 11, 14, 15, 26, 27 and 40. Doctorates are research and scholarship doctorates; professional doctorates appear only in the degree-count figure. Degrees are first majors only.

### Universe

Degree-granting institutions located in the state; Title IV participants from 1996. Geography is the institution's location, not the student's home. Enrollment is fall headcount.

### Migration

First-time degree-seeking undergraduates by home state, reported in even years before 2001 and every year since; odd years with incomplete reporting are omitted. Net migration is students arriving from other states minus residents leaving, per 100 resident first-time students.

### Money

All dollar values are in 2024 dollars using the CPI-U. Appropriations and revenue are per full-time-equivalent student at public institutions.

### Race and ethnicity

IPEDS did not collect race and ethnicity in every year before 2010, and categories changed in 2008–2010; “Two or more” exists only from then.

### Countries of citizenship

From DHS SEVIS by the Numbers: active F-1 and M-1 student records in the month named, at every level from primary school to doctorate, by the state of the school. IPEDS records only whether a student is a U.S. nonresident, not where they come from. SEVIS counts are monthly snapshots and are not directly comparable with IPEDS fall enrollment or degree counts.

### Peers

Comparison states are the four closest in total fall enrollment.
