# About This Profile

This profile is a companion to *The 2026 US Talent Report: Benchmarking America's STEM Pipeline Amid the Great Talent Competition*. It applies the report's measures to Georgia: the students the state develops at home, those it draws from abroad, and how both compare with the nation and with the states closest to it in size.

Degrees, enrollment, prices, outcomes and faculty come from IPEDS, the federal census of U.S. colleges and universities, harmonized across 1980–2025. Countries of citizenship come from SEVIS by the Numbers, the Department of Homeland Security's monthly count of active F-1 and M-1 students. Each figure names its source. Peer states are the four closest in total fall enrollment.

# What Georgia's numbers say

1. **International students earn 44% of Georgia's STEM master's degrees,** 8.3 points below the U.S. (52%) in 2025, ranking 25th of 51 on dependence. The share is 44% for STEM research doctorates (U.S. 43%) and 7.1% for STEM bachelor's (U.S. 6.6%).
2. **Georgia awarded 3.78K STEM master's degrees to international students in 2025,** 3.2% of the U.S. total and 11th of 51 among states. Since 2015 the count changed 3.6×, against 2.2× nationally.
3. **The heaviest dependence is in math & statistics,** where international students earned 71% of master's degrees (241 degrees; U.S. 55%). 2 STEM fields with at least 50 master's graduates are majority-international.
4. **Among states of similar size,** Georgia ranks 4th of 5 on the international share of STEM master's: Georgia 44%, North Carolina 49%, Ohio 58%, Virginia 39%, Pennsylvania 54%.
5. **82% of Georgia's first-time students in fall 2024 were state residents** and 2.8% came from abroad. More residents left for other states (19.6K) than students arrived from them (13.7K), a net loss of 5.93K; the top destination for those leaving was Alabama.

In 2016, the last year NSF published state tables, 33% of Georgia's science and engineering graduate students held temporary visas (U.S. 39%; 28th of 51).

Among postdoctoral researchers, the share was 49% (U.S. 56%). Postdocs are the stage of research training most dependent on international talent, and IPEDS does not count them.

The state's institutions awarded 1.61K research doctorates in 2025, 2.7% of the U.S. total (Data from NSF NCSES, Survey of Earned Doctorates; NSF publishes doctorates by citizenship only for the nation).

NOTES

# About These Data

**International students**

U.S. nonresidents on temporary visas, as IPEDS defines them. IPEDS does not record country of citizenship. Permanent residents count with U.S. citizens.

**STEM**

CIP families 03, 04, 11, 14, 15, 26, 27 and 40. Doctorates are research and scholarship doctorates; professional doctorates appear only in the degree-count figure. Degrees are first majors only.

**Universe**

Degree-granting institutions located in the state; Title IV participants from 1996. Geography is the institution's location, not the student's home. Enrollment is fall headcount.

**Migration**

First-time degree-seeking undergraduates by home state, reported in even years before 2001 and every year since; odd years with incomplete reporting are omitted. Net migration is students arriving from other states minus residents leaving, per 100 resident first-time students.

**Money**

All dollar values are in 2024 dollars using the CPI-U. Appropriations and revenue are per full-time-equivalent student at public institutions.

**Race and ethnicity**

IPEDS did not collect race and ethnicity in every year before 2010, and categories changed in 2008–2010; “Two or more” exists only from then.

**Countries of citizenship**

From DHS SEVIS by the Numbers: active F-1 and M-1 student records in the month named, at every level from primary school to doctorate, by the state of the school. IPEDS records only whether a student is a U.S. nonresident, not where they come from. SEVIS counts are monthly snapshots and are not directly comparable with IPEDS fall enrollment or degree counts.

**Peers**

Comparison states are the four closest in total fall enrollment.
