Data come from the Integrated Postsecondary Education Data System (IPEDS), the Department of Homeland Security's SEVIS by the Numbers, the National Assessment of Educational Progress, NSF's Survey of Graduate Students and Postdoctorates and Survey of Earned Doctorates, the Department of Labor's Office of Foreign Labor Certification, the USCIS H-1B Employer Data Hub, the Census Bureau's American Community Survey and USPTO patent data via PatentsView, processed in Python; every figure and table is generated from those sources, and each one names its source.

About This Profile

This profile is a companion to *The 2026 US Talent Report: Benchmarking America's STEM Pipeline Amid the Great Talent Competition*. It applies the report's measures to Washington: the students the state develops at home, those it draws from abroad, and how both compare with the nation and with the states closest to it in size.

Degrees, enrollment, prices, outcomes and faculty come from IPEDS, the federal census of U.S. colleges and universities, harmonized across 1980–2025. Countries of citizenship come from SEVIS by the Numbers, the Department of Homeland Security's monthly count of active F-1 and M-1 students. Each figure names its source. Peer states are the four closest in total fall enrollment.

AT A GLANCE

What Washington's numbers say

1. **International students earn 39% of Washington's STEM master's degrees,** 12.7 points below the U.S. (52%) in 2025, ranking 30th of 51 on dependence. The share is 34% for STEM research doctorates (U.S. 43%) and 8.0% for STEM bachelor's (U.S. 6.6%).
2. **Washington awarded 1.22K STEM master's degrees to international students in 2025,** 1.0% of the U.S. total and 22nd of 51 among states. Since 2015 the count changed 2.5×, against 2.2× nationally.
3. **The heaviest dependence is in math & statistics,** where international students earned 53% of master's degrees (246 degrees; U.S. 55%). One STEM field with at least 50 master's graduates is majority-international.
4. **Among states of similar size,** Washington ranks 5th of 5 on the international share of STEM master's: Washington 39%, Wisconsin 55%, Tennessee 50%, Missouri 83%, Alabama 43%.
5. **85% of Washington's first-time students in fall 2024 were state residents** and 2.3% came from abroad. More residents left for other states (14.8K) than students arrived from them (6.31K), a net loss of 8.54K; the top destination for those leaving was California.

39%

of the STEM master's degrees Washington awards go to international students (U.S. 52%).

In 2016, the last year NSF published state tables, 26% of Washington's science and engineering graduate students held temporary visas (U.S. 39%; 40th of 51).

Among postdoctoral researchers, the share was 47% (U.S. 56%). Postdocs are the stage of research training most dependent on international talent, and IPEDS does not count them.

The state's institutions awarded 929 research doctorates in 2025, 1.6% of the U.S. total (Data from NSF NCSES, Survey of Earned Doctorates; NSF publishes doctorates by citizenship only for the nation).

State solid, U.S. or participating states dashed.

Washington's institutions do not take part in the Census Post-Secondary Employment Outcomes program, so in-state employment of its graduates is not published.

Among international graduates on Optional Practical Training in 2016, 75% worked in the state where they studied (U.S. 44%). Through migration between states, the state gained 4.3 bachelor's-plus adults per 1,000 such residents in 2025 (Data from U.S. Census Bureau, American Community Survey).

Washington's universities spent $2.16B on research and development in FY2024, 17th of 51 among the states; 64% of it was federally funded (U.S. 55%).

Federal agencies obligated $3.26B for R&D performed in the state in FY2024. Research funding drives demand for graduate students and postdocs, the stage of training most dependent on international talent.

Certified H-1B positions on labor condition applications by worksite and certified PERM green-card applications, by fiscal year (Data from DOL, Office of Foreign Labor Certification); new H-1B petition approvals by the employer's address (Data from USCIS, H-1B Employer Data Hub).

Employers were certified for 83K H-1B positions at Washington worksites in FY2025, 3rd of 51 among the states. A labor certification comes before the petition, so this overstates hires; USCIS approved 2.13K new H-1B petitions from employers in the state in FY2026.

DOL certified 5.42K PERM applications, the employer's step toward an employment-based green card, for jobs in the state in FY2025. In FY2024, 11% were for workers still on F-1 student visas (U.S. 8.7%): the most direct link from classroom to permanent residence.

NOTES

About These Data

International students

U.S. nonresidents on temporary visas, as IPEDS defines them. IPEDS does not record country of citizenship. Permanent residents count with U.S. citizens.

STEM

CIP families 03, 04, 11, 14, 15, 26, 27 and 40. Doctorates are research and scholarship doctorates; professional doctorates appear only in the degree-count figure. Degrees are first majors only.

Universe

Degree-granting institutions located in the state; Title IV participants from 1996. Geography is the institution's location, not the student's home. Enrollment is fall headcount.

Migration

First-time degree-seeking undergraduates by home state, reported in even years before 2001 and every year since; odd years with incomplete reporting are omitted. Net migration is students arriving from other states minus residents leaving, per 100 resident first-time students.

Money

All dollar values are in 2024 dollars using the CPI-U. Appropriations and revenue are per full-time-equivalent student at public institutions.

Race and ethnicity

IPEDS did not collect race and ethnicity in every year before 2010, and categories changed in 2008–2010; “Two or more” exists only from then.

Countries of citizenship

From DHS SEVIS by the Numbers: active F-1 and M-1 student records in the month named, at every level from primary school to doctorate, by the state of the school. IPEDS records only whether a student is a U.S. nonresident, not where they come from. SEVIS counts are monthly snapshots and are not directly comparable with IPEDS fall enrollment or degree counts.

Peers

Comparison states are the four closest in total fall enrollment.
